EL PRESIDENTE
DE I.A.
JUNTA DE ENERGIA NUCLEAR

Madrid, March 11, 1976

Dr. James L. Liverman, Director
Division of Biomedical and Environmental Research
U.S. Energy Research and Development Administration
Washington, D.C. 20545
U.S.A.

Dear Dr. Liverman:

In reply to your letter of January 23, 1976 informing us of the 3 appointments to the informal committee which is going to oversee your participation in the Otero-Hall Agreement, I am pleased to inform you that we fully agree with such decisions. On our side, in order to go ahead with Project Indalo, we have appointed the following men:

Dr. Eduardo Ramos, former leader of our Medical and Health Division, who headed it for many years and now acts as a consultant in this field.

Dr. Emilio Irazo, who succeeded to the above mentioned post following Dr. Ramos' retirement. Dr. Irazo was connected with all this work from the very beginning.

Dr. Francisco de los Santos, in charge of the whole body counter and of all measurements related to the plutonium content in the population of the affected areas.

I do hope that both American and Spanish representatives may succeed in developing together future programs in this respect and in going ahead with their work.

With kind regards,

Yours sincerely,

Jesús Olivares
